

## **Report (150/200)**

- Different options for each component (frontend/backend, database) were listed and a comparison of the pros and cons were made for each of them.
- A summary of decisions made is missing.
- Would be nicer if some references were added when making certain claims..

## **Deployed Application (540/600)**

### **1 - The application is functional (200/200)**

- Basic functionality is working fine (e.g. adding/removing items, summing the total amount, and applying tax).
- A database is implemented.

### **2 - The application's UI is present and usable (180/200)**

- A simple UI is built and the UI is cohesive and clear.
- UI is visually appealing.

### **3 - Testing infrastructure implemented (160/200)**

- A basic testing infrastructure is implemented.

## **Testing Availability (165/200)**

### **1 - The application is deployed (80/100)**

- App can be tested through Expo.

### **2 - Instructions for testing are provided (85 /100)**

- Instructions are provided to run the application and unit tests.
- A quick walkthrough of the app functionalities was also included.

**Total:  $150/200 * 20\% + 540/600 * 60\% + 165/200 * 20\% = 85.5\%$**
